14 September 2017

Dear Prime Minister,

### **NORTHERN ROCK: A COMPELLING CASE FOR COMPENSATION**

Six pensioners (including 87yr old Bill Brown, International banker and author), have travelled from Scotland and the North of England today to deliver this plea to you personally. We do appreciate the many challenges you are managing but may we please urge you to take a personal interest in the injustice suffered by the Northern Rock shareholders who have campaigned for ten years for fairness & compensation.

As the UK marks the 10th anniversary of the Northern Rock crisis in 2007 may we suggest to you that it would be appropriate now to try and achieve a just closure on an equitable, morally sound and fair basis; we are very encouraged by your principled leadership and your strong commitment to fairness. Our group has commissioned a very thorough and factual detailed review of all the aspects of the Rock handling, and we have produced a large and, we think, quality report for consideration by you and your trusted political aides. The research has been done!

We make no demands; we simply ask for a reading and decent consideration of our documentation and evidence, starting with the very short summary attached. After that we would respectfully suggest and request an informal meeting with your advisors to give more details and evidence for your scrutiny and consideration.

May we look forward to hearing from you at your convenience.  
Thank you,

Yours faithfully,

Dennis Grainger

Chairman  
Northern Rock Small Shareholders Action Group
